

Requestly Product Roadmap

Product Feature Roadmap

Core API Client

HTTP Client

- Send HTTP requests with auth helpers, dynamic variables, console & history
- Examples, code snippets, and bulk editing
- Request saving and request history

Released

Variables, Environments & Secrets

- Initial vs current values, collection & global variables
- Path variables, secret variables
- Team environments

Released

Scripts, Sandbox & Test Types

- Pre-request & test scripts & pm.* API & Chai assertions
- Sandbox runtime, external npm/JSR packages, team package library
- Collection Runner with imported data
- Integration, E2E & regression testing
- CLI runner

Released

Product Feature Roadmap

Import, Export & Sync

Importers

- cURL, URL, HAR, Collection
- OpenAPI / Swagger
- WSDL

Released

Exporters & Sync

- Export collections & environments as JSON
- Cross-device sync

Released

Product Feature Roadmap

Multi-Protocol Support

GraphQL & SOAP Protocols

- Basic GraphQL Client (WIP)
- Schema import & introspection
- Mutations & subscriptions
- SOAP request

Released

gRPC Client

- Core client, proto import
- Server reflection
- Streaming modes

Planned - Q2'FY26

Auth Protocols

- CA / client certs, JWT bearer, Digest, Hawk, AWS, NTLM
- 1Password, Azure Vault, HashiCorp secret managers

Released

WebSocket, Socket.IO & MQTT

- WebSocket, Socket.IO & MQTT
- Raw WebSocket & Socket.IO clients
- MQTT v3.1.1 / v5.0 with publish, subscribe, LWT, auth

Released

Product Feature Roadmap

API Lifecycle (Design, Docs, Mock)

Spec Hub

- Spec authoring with live preview, schema ↔ collection sync
- Governance rule library, request-level governance, custom rules (Spectral)
- Component library, server code generation, syntax error detection

Released

Documentation

- Auto-generated docs with versioning & changelogs
- Public/private visibility, custom domains
- Fern docs & SDK generator integration; Notebooks

Released

Mock Endpoints

- GraphQL mocking, network delay simulation
- Dynamic variables, response matching, wildcards
- API-driven mock server management, create from collection

Planned - Q2'FY26

Product Feature Roadmap

Observability & Test Automation

Traffic Capture

- Built-in proxy capture (HTTP & HTTPS)
- Cookie syncing, capture filters
- Save captured requests to collection

Planned - Q3'FY26

Insights

- Endpoint metrics, latency & error monitoring
- Automatic endpoint discovery, traffic observation agent
- AI alert summaries, Slack alerts, data redaction

Planned - Q3'FY26

Monitors & CLI

- Scheduled monitors with regional locations & static IPs
- Thresholds & alerts, scale runners, runner proxy
- Postman CLI + Reporters + GitHub Actions integration

Planned - Q2'FY26

Product Feature Roadmap

Collaboration, Catalog & Flows

Workspaces & Sharing

- Public workspaces, guest access, partner workspaces
- Activity logs, announcements, featured collections
- Multi-partner mode + partner SSO

Planned - Q2'FY26

API Catalog & Network

- Private API Network, search & filtering, folder organization
- Tagging, overview pages, approvals, health metrics
- Discovery sources (gateways/infra), environment tracking, relationship mapping

Planned - Q2'FY26

API Flows

- Blocks, actions, query language, TypeScript support
- Third-party connectors, scheduled flows, snapshots
- AI blocks (Agent, Create-with-AI), MCP server action, cloud deployment with bearer auth

Planned - Q2'FY26

Product Feature Roadmap

IDE & Ecosystem

VS Code Extension

- Send requests from editor, collection runner inside VS Code
- Manage certs in IDE, package imports in scripts
- Compatible with Cursor & Windsurf

Planned - Q2'FY26

Integrations Marketplace

- API automation, monitoring, observability, security, testing
- APM, gateway, git, incident response, workflows
- Documentation, collaboration, storage, SDK, open spec

Planned - Q2'FY26

Product Feature Roadmap

Enterprise & Security

Identity & Access

- SSO (SAML / OIDC)
- SCIM provisioning
- Domain verification & capture, Roles & RBAC

Planned - Q2'FY26

Audit & Governance

- Audit logs across critical actions
- Secret scanner + dashboard
- API security, builder, content activity, member, billing reports & dashboards

Planned - Q2'FY26

Enterprise Controls

- API key management, app versioning / deployment controls
- BYOK encryption, EU data residency, static IP monitoring
- Organizations, workspace settings, team product access
- Billing — resource, agent, flows usage tracking

Planned - Q2'FY26

Product Feature Roadmap

Self-Hosting

Deployment Foundation

- Docker & Docker Compose, Kubernetes (Helm)
- Air-gapped / offline deployment
- Bundled (PostgreSQL/MongoDB) and external DB configuration

Planned - Q3'FY26

Operations & Compliance

- Backup & disaster recovery, TLS/SSL & custom certs
- SSO & directory sync, admin console, license management
- Data residency & compliance, HA + horizontal scaling
- Monitoring/logging/observability, automated upgrades, reverse proxy, S3-compatible object storage

Planned - Q3'FY26

Product Feature Roadmap

AI Chat Assistant

Chat Interface

- Conversational AI sidebar for API tasks via natural language
- Natural-language task execution (create requests, run tests, etc.)
- Context-aware across active workspace, tabs, collections, environments

Planned - Q2'FY26

Productivity Skills

- Slash commands / skills
- Multi-step workflow orchestration (create collection → add requests → generate tests in one prompt)

Planned - Q2'FY26

Human-in-the-Loop Safety

- AI proposes changes; user approves each tool action before execution
- Per-tool approval gate before any destructive edit

Planned - Q2'FY26

Product Feature Roadmap

AI Authoring

Request & Spec Authoring

- AI Request Builder — create API requests from natural language (e.g. "GET /users with Bearer token")
- AI OpenAPI Editor — author/edit specs, suggest schemas and endpoints

Planned - Q2'FY26

Test & Script Generation

- AI Test Script Generator (in chat) — pre-request & test scripts on demand
- AI Code Autocomplete — real-time autocomplete in pre-request and test script editors

Planned - Q2'FY26

Mock & Docs

- AI Mock Server Builder — create mock servers conversationally
- AI Doc Crawler — crawl web-based API docs, extract endpoints, generate draft collections

Planned - Q2'FY26

AI Feature Roadmap

MCP & AI Tooling

MCP Server Generation

- MCP Server Generator — turn any API collection into an MCP server with no boilerplate
- One-click deployment of Flows as callable MCP servers

Planned - Q3'FY26

MCP Client

- Send MCP requests
- Evaluate and compare MCP servers

Planned - Q3'FY26

IDE Bridge

- Expose Requestly to AI IDEs — Cursor, VS Code Copilot, Windsurf
- Native integration paths for agent workflows

Planned - Q3'FY26

LLM Integrations

- First-class request type for sending prompts to LLMs (OpenAI, Anthropic, etc.)
- Convert APIs into agent-ready tools for AI frameworks (LangChain, AutoGen)

Planned - Q3'FY26

AI Feature Roadmap

Agent Architecture

Orchestrator + Generalist

- Parses intent, picks specialist, plans multi-step tasks, enforces per-tool approval

Planned - Q3'FY26

Generalist Agent

- Universal operator for ambiguous / cross-domain tasks, full SDK tool catalog

Planned - Q3'FY26

Operator Specialists

- Structural CRUD on collections, folders, requests, examples (rename, move, tag)
- Generates pre-request + test scripts, debugs failures via response + script context

Planned - Q3'FY26

Research Specialists

- web search for third-party docs, auth requirements, known errors (with source citations)
- bootstraps a collection from a public docs URL when no OpenAPI spec exists

Planned - Q3'FY26

Thank you
